

## Biofeel Stem Cell Therapy

[Specialized in cell regeneration for beautiful skin and healthy body](#)

Biofeel Stem Cell Therapy aims to awaken dormant cells within the human body, thereby stimulating the growth and function of existing tissue and repairing or regenerating old and malfunctioning cells.

Biofeel Stem Cell Therapy provides vitamins, minerals and other necessary potent ingredients that conventional or natural treatments are unable to provide to the body in which that exact components are important for injured or diseased tissue to heal and regenerate.

While most pharmaceutical drugs work by suppressing certain symptoms over a short period of time and the effect of the pharmaceutical drugs only last as long as they are taken. Biofeel Stem Cell Therapy strengthens the immune system, stimulates the body's own healing and revitalizing powers and will exerts a long term effect. Therefore, Biofeel Stem Cell Therapy able to treat a wide variety of degenerative diseases.

## [Role of Platelet](#)

The alpha granules of platelet contain not only the growth factors that performs the basic function in hemostasis or tissue healing such as PDGF, TGF, PDAF, PDEGF, EGF, TNF, LDGF, FGF and CTGF but proteins that act on cell adhesion such as Fibrin, Fibronectin, Vitronectin.

The generation of new blood vessel and fibrous tissue as well as colla genesis stimulated by growth factors facilitates the quick regeneration of epithelial cells and enhances the ability to heal wounds.

## [Growth Factors in Blood and Cell Regeneration using Blood Stem Cells](#)

### [PRP Injection Treatment](#)

The ample growth factors contained in platelets activate stem cells to help tissue regeneration and relieve inflammation. Unlike pre-existing treatments that inject artificial chemical substances, the PRP injection treatment uses your own blood, which has been proven to have in no side effects such as allergic reactions or bacterial infections. It has also been proved to be safe and very effective in treatment and pain relief.

## PRP Treatment Procedures

- 1) **Blood Collection:** Collect 15ml of blood.
- 2) **Platelet Separation:** Concentrate platelet using a centrifuge.
- 3) **PRP Extraction:** Extract a part of concentrated platelet and plasma with syringe.
- 4) **PRP Injection:** Inject the concentrated PRP to the treatment area using an injector.

## Biofeel Stem Cell Therapy can also give you the following health & anti-aging benefits:-

- Repairing free-radical damage cells; therefore, slowing down aging process.
- Creating deep and lasting cell rejuvenation.
- Regenerating cells, tissues in the body especially for internal organs.
- Delay Menopause and reduction in Pre-Menopause Syndrome; indication of aging.
- Enhancement in Stamina and Energy Level, preventing fatigue.
- Diminishing fine lines and wrinkles.
- Protecting and restoring damaged skin.
- Improve skin elasticity and thickness.
- Lighten facial pigmentation, make your skin youthful and glowing.
- Improve skin complexion, even skin toned colour.
- Tighten skin & reduce open pores problems, reduce dark under eyes circles.
- Vast improvement in the immune system against diseases.
- Deeper and more relaxing sleep.
- Promotes flexible joints and prevent degenerative joint diseases.
